CorneliuGroup Camp Learning in Nature *Educational program*

Author: Corneliu BIRTOK BANEASA & Team

Starting from the concept of "outdoor education", **Corneliu Group Camp - Learning in Nature** aims to offer young people an optimal framework for the preparation of educational projects, in parallel with the development of the creative spirit and connection with nature.

We encourage #CreativeMindPower, #OutsideTheBox thinking and #SDGActions so if you want a balance between formal education and creativity, we welcome you to join our camp!

Another important part of **Corneliu Group Camp - Learning in Nature** project is environmental protection through implementation of **Sustainable Development Goals**.

Our main objective is for young people to spend as much time as possible in nature in the spirit of SDG. In this sense, we have developed programs to teach young people about the importance of communion between man and nature through practical actions as: Planting trees, Creating Vegetable Gardens, Plant careing, Planting Aromatic Plants, Cutting grass.

"Be stubborn and follow your dream!"
